HARD SKILLS

- **Frontend:** HTML, React, TypeScript, React Router
 - **State/Data:** React Query, REST API, Zod
 - **Testing:** Vitest, Testing Library
 - **Tooling:** Vite, ESLint, Prettier, Git
 - **UI:** CSS (BEM), Responsive Design
-

Education

Computer Science
Innopolis University
2023 - 2027

Additional experience

Solving algorithmic problems (Codewars, reached 4 kyu)

Summary

Frontend Developer (React, TypeScript), developing SPAs with authentication, REST API integration, and server state management. Working with React Query, Zod, and component-based architecture, with a strong focus on maintainability and performance.

Work experience (project)

VK Marusya (11/2025-01/2026):

Stack: React, TypeScript, React Router, React Query, Zod, Vite, Vitest, ESLint, CSS/BEM

- Developed a responsive Single Page Application (SPA) from scratch.
- Architected project structure, ensuring clean separation of concerns between logic and presentation.
- Extracted reusable UI components and custom hooks to streamline development.
- Integrated REST APIs with strict TypeScript typing and data validation using Zod.
- Implemented a secure authentication flow and protected routes with 401/Unauthorized error handling.
- Utilized React Query for efficient server state management, including caching, refetching, loading, and error states.
- Built pagination and debounced search functionality to improve user experience.
- Covered core business logic with unit tests using Vitest and React Testing Library.
- Optimized application performance and load times via lazy loading and code splitting.
